

This project has received funding from the European Union's Horizon 2020 research and innovation programme under project number 101017083

Funded by European Union Civil Protection

Fire analysts are **active resources** to be deployed during emergencies and **assess incident commanders** in decision-making

As a result, **strategical, tactical and operational vision improves**, overall increasing the **safety of crews** during emergency management

AFAN **strengthens and empowers** networks by learning **together** and **harmonising** methodologies

Fire analysts collect fire information and develop expertise to transform it into **knowledge**. This is **shared** between networks based on **trust, commitment and confidentiality**
