

INVITATION

Boosting the Future: Covalex 2024 Project Launch and Training Event

11/06/2024 | Hora 09:00

Ferrol Industrial Campus, España

Dear Sir or Madam,

We are pleased to extend to you a cordial invitation to the event organized by the University of A Coruña, by the Covalex Project.

This event marks a significant milestone in our effort to foster development and training in our community. The Covalex Project has been dedicated to promoting innovation and progress through educational and community initiatives, and this event is a unique opportunity to share our achievements, launch new campaigns and offer high quality training in both face-to-face and online modalities.

We strongly believe that your participation will greatly contribute to the success of this event and strengthen the bonds within our learning community. It will take place on June 11, at the Faculty of Humanities and Documentation of the Industrial Campus of Ferrol.

It will be an honor for us to count on your presence.

Best regards,

The Covalex UDC team

The full agenda for the day can be found below:

Tuesday, April 11th			
Faculty of Humanities and Documentation	09.00 – 09.15	Registration & Welcome	
Campus Restaurant	09.15 – 09.30	Campaign Launch	<p>We launched a campaign that underscores our dedication to natural disaster prevention and management, featuring a video of the drill conducted earlier in the year.</p> <p>In collaboration with experts in engineering, emergency management and civil protection agencies.</p> <p>Our goal is to educate and raise awareness among authorities, communities and organizations about the importance of being prepared for emergency situations.</p>
Faculty of Humanities and Documentation	09.30 – 10.00	Classroom Training	Flood training, good practices and lessons learned from the April 9-10 drill in Ferrolterra.
Faculty of Humanities and Documentation	10.00 – 10.30	Coffee break	
Faculty of Humanities and Documentation	10.30 – 12.30	Workshop: Effective application of the DRR tool for hydrometeorological hazards at the local level	<p>By Vasko Popovski, M.A., Disaster Risk Management Consultant. Organized by NALAS.</p> <p>The objective is to raise awareness on innovative resilience building to hydrometeorological risks among innovation professionals from local governments and innovation centers.</p>

This online, English-language portion of the event will provide participants with critical information on the nature and impact of climate-related hazards, equipping them with the essential knowledge needed to understand the resilience-building process.

Through expert-led presentations and interactive discussions, attendees will explore the latest innovations and solutions in risk assessment, early warning systems, mitigation techniques, preparedness and response.

About COVALEX

The objective of COVALEX is to establish a common and expanded community of experts leveraging experience, geographic coverage and diverse sectoral networks in the field of multi-hazard hydro-meteorological-hydrological events.

- **Capacity building pillar:** Promotes and strengthens the capacities and knowledge of experts and creates a database of specific experts who can participate in international and local case studies and events.

- **Scientific Pillar:** Convenes experts and decision-makers to promote multidisciplinary and cross-sectoral collaboration for the effective application of scientific knowledge in disaster risk management (DRM). Special attention is given to the development and implementation of strategies to address hydrometeorological and technological disasters.
