COPERNICUS EMERGENCY MANAGEMENT SERVICE

-  On-Demand Mapping
-  Wildfires
-  Floods
-  Droughts
-  Exposure Mapping

RASTOOL-DOS: OBJECTIVE

Facilitating the uptake of European Ground Motion Service (EGMS) by civil protection authorities in disaster risk management.

Developing a prototype of On-Demand Mapping service related with Ground Motion information for the Copernicus Emergency Management Service

Transform EGMS data into actionable and clear maps

Giving information on the localization, characterization, and potential impact on structures and infrastructures of Ground Motions phenomena

RASTOOL-DOS: OUTPUTS AND STRATEGY

Pan-European Scale Service Demonstration

Output:

Pan-European maps derived by the whole **EGMS dataset**

Strategy:

Collaboration with the CLMS (Advisory Board)

Local scale Service Demonstrations

Output:

Local maps based on real risk scenarios, and specific needs of 4 pilot areas located in **Italy, Spain, Portugal, and Greece**.

Strategy:

Collaboration with the Joint Research Centre (Advisory Board)
Engagement of the local Authorities (meetings, simulations, questionnaires)

Adapting tools developed in the RASTOOL project (UCPM-2021-PP)
