# 3IDRM

Innovative, Integrated and Inclusive Disaster Risk Management

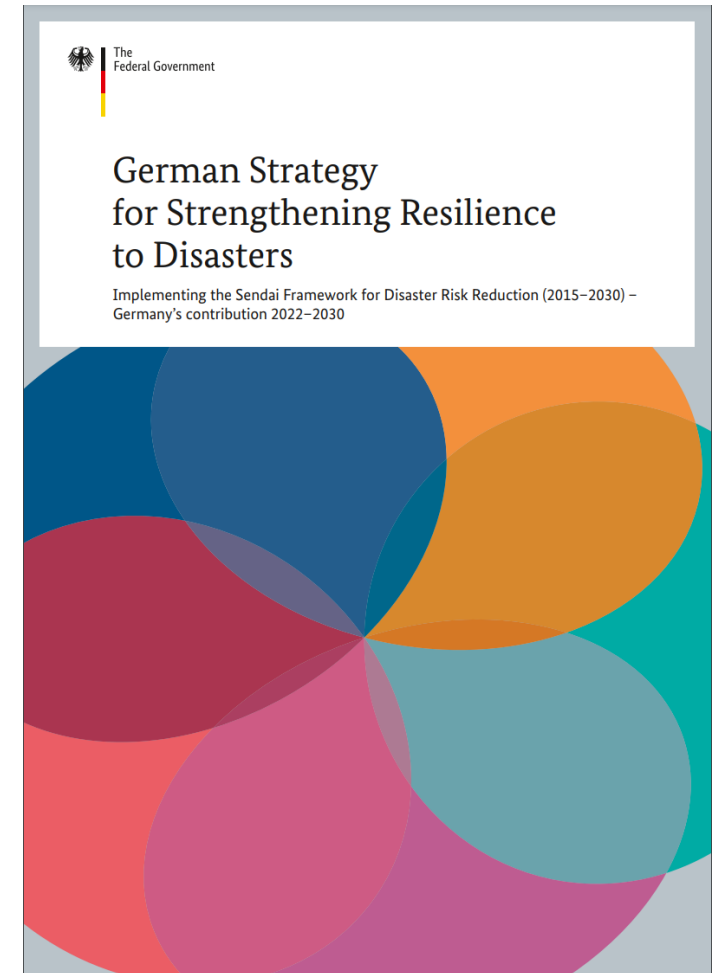

BBK. Gemeinsam handeln. Sicher leben.

## 3IDRM – Project overview

Project	3IDRM
Start	1 April 2025
End	31 March 2027
Type	Single country grants for disaster risk management (Track 1)
Total Budget	EUR 586
EU Contribution	EUR 512 286.00
Geographic Focus	Germany
Coordinator	Federal Office of Civil Protection and Disaster Assistance (BBK)

## 3IDRM - Background

- The **German Disaster Resilience Strategy** defines **49 measures**, many of them are not limited to the roles and responsibilities of one specific authority.
- This applies especially to **cross-sectoral issues** such as integrated collection and analysis of data, the inclusion of vulnerable groups in the disaster risk management system, or the use and awareness of innovative technologies.

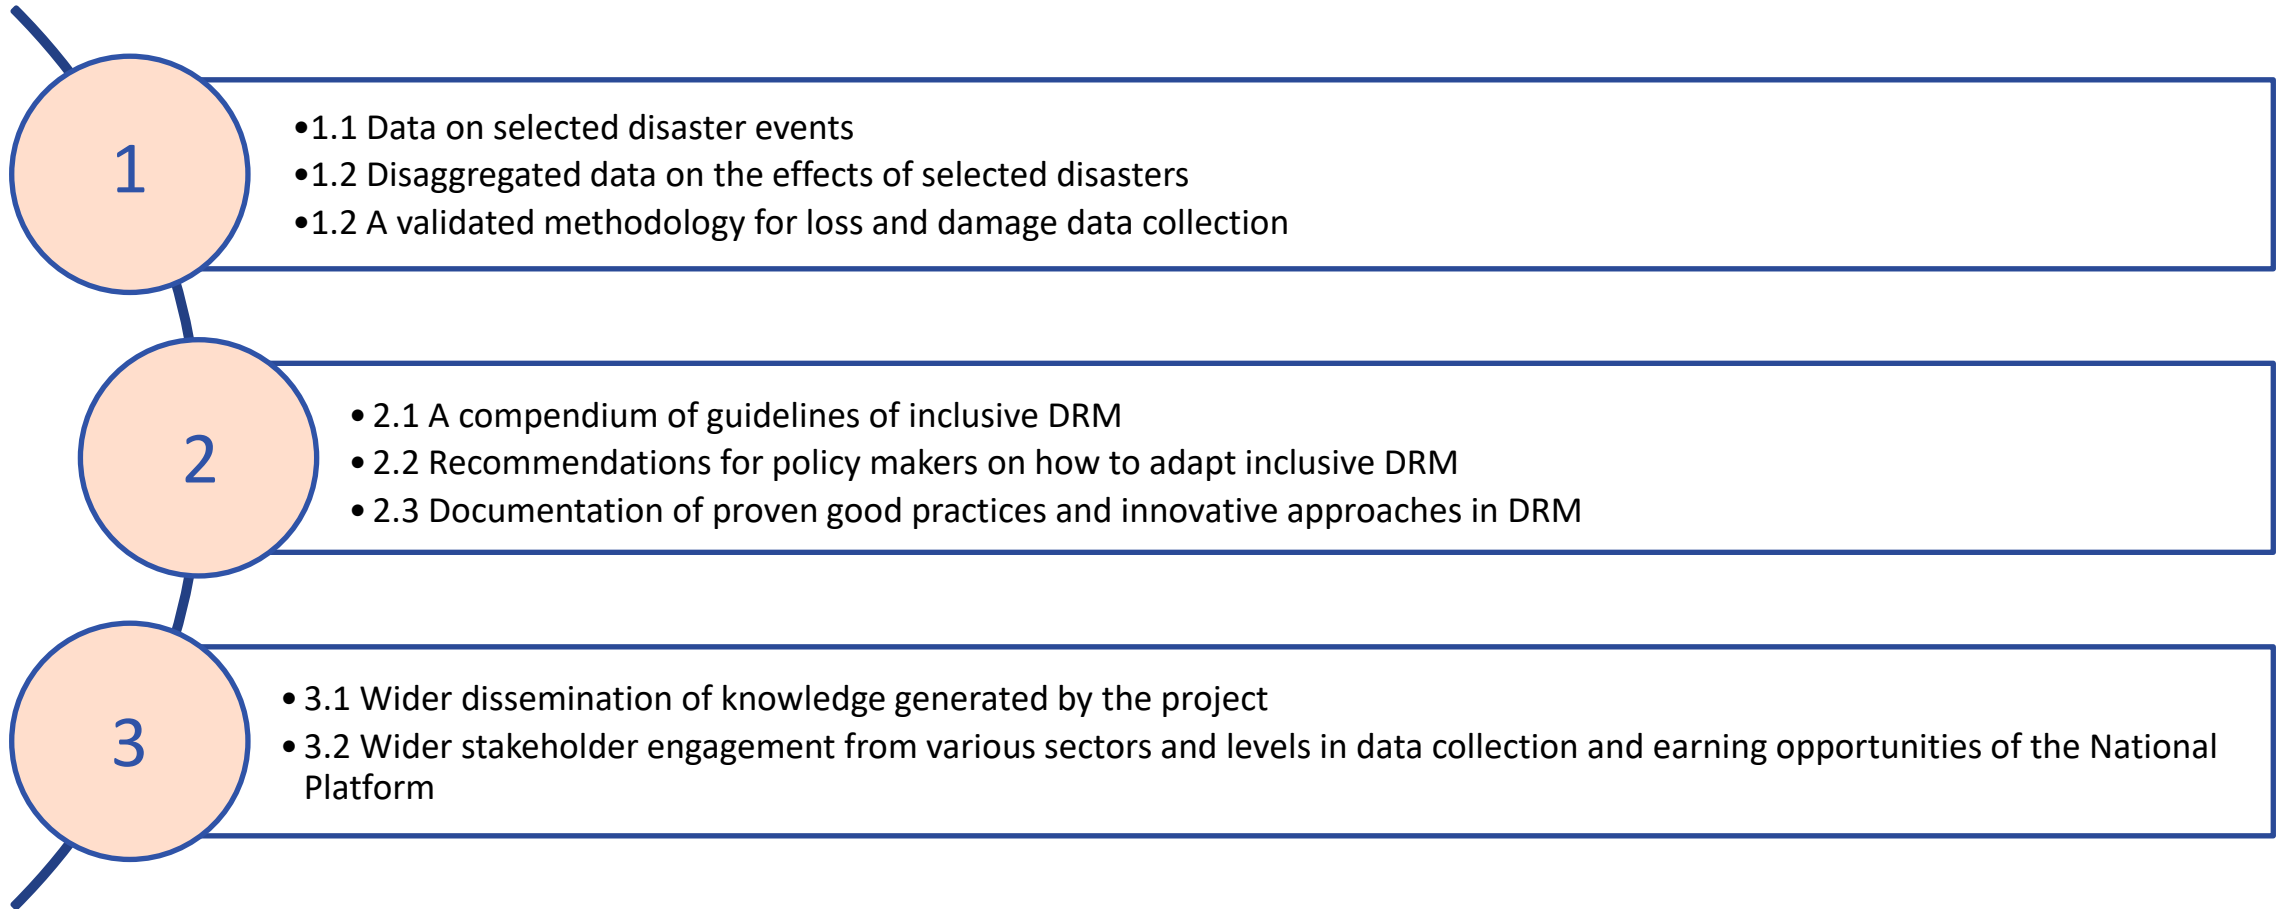

## 3IDRM – Description of Action

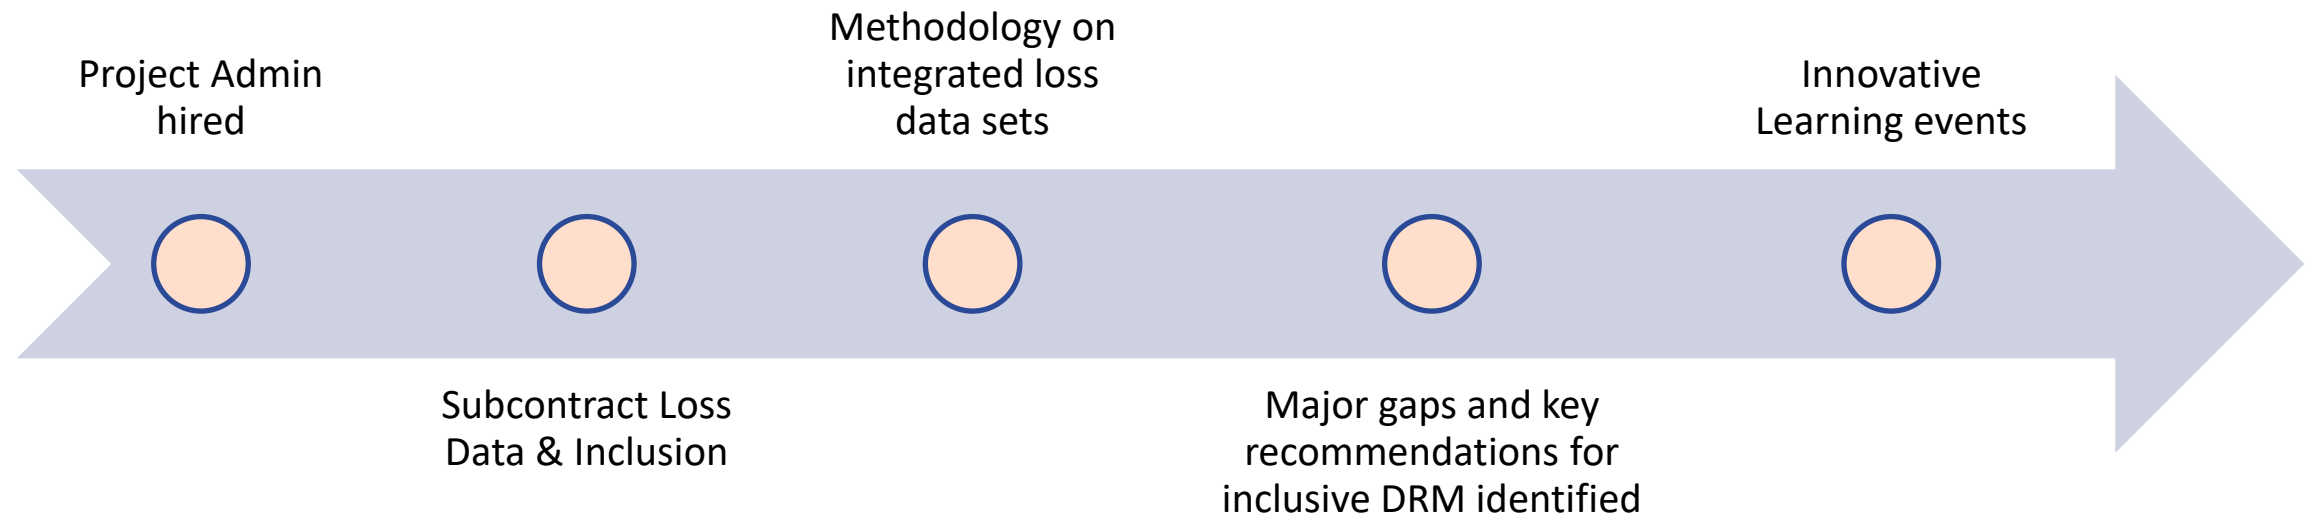

---

1. Improve the **understanding of disasters by consolidating damage and loss data** on major events in Germany in the past 20 years through an **integrative approach**, pooling official and open sources as well as participatory contributions.
2. **Enhance inclusive government services** by identifying current gaps and defining clear recommendations on how to empower **vulnerable groups** in the national disaster risk management system.
3. Facilitate mutual learning/training and **exchange of experiences** on **innovative approaches** and technologies through study visits and exchange seminars and among various stakeholders engaged in disaster risk management from civil-society, science, private sector and the media/culture/education sector.

## 3IDRM – Expected outputs

## 3IDRM - Milestones
