POLAND25.EU

The SILVANUS idea

(Mojir et al., 2023)

SILVANUS envisages to deliver an environmentally sustainable and climate resilient forest management platform through innovative capabilities to prevent and combat against the ignition and spread of forest fires. The platform will cater to the demands of efficient resource utilisation and provide protection against threats of wildfires encountered globally. The project will establish synergies between (i) environmental; (ii) technology and (iii) social science experts for enhancing the ability of regional and national authorities to monitor forest resources, evaluate biodiversity, generate more accurate fire risk indicators and promote safety regulations among citizens through awareness Campaigns.

Project ID card:

SILVANUS – Grant agreement ID:
101037247

Start date: 1 October 2021

End date: 31 March 2025

Funded under: H2020-LC-
GD-2020-3

Overall budget: € 24 186 845

EU contribution: € 19 902 190

Coordinated by: UNIVERSITA
TELEMATICA PEGASO – Italy

This project has received funding
from the European Union's
Horizon 2020 research and
innovation programme under
Grant Agreement no. **101037247**

49

Project partners from Europe,
Indonesia, Australia and Brasil

42

Months of project duration

24

Reference technologies to support civil
protection entities in wildfire
management

Detection technologies

1. Fire detection using IoT devices

2. Fire detection at the Edge

3. Fire detection based on social sensing

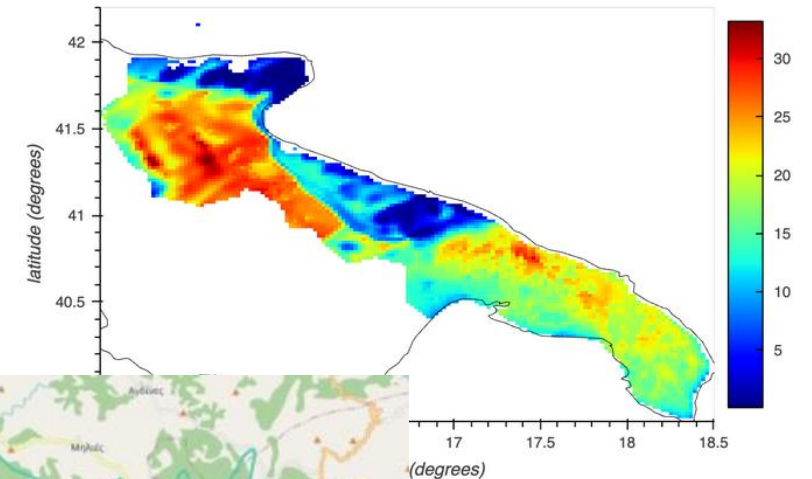

Computational tools

1. Biodiversity profile mobile app (Woode)

2. Fire danger risk assessment

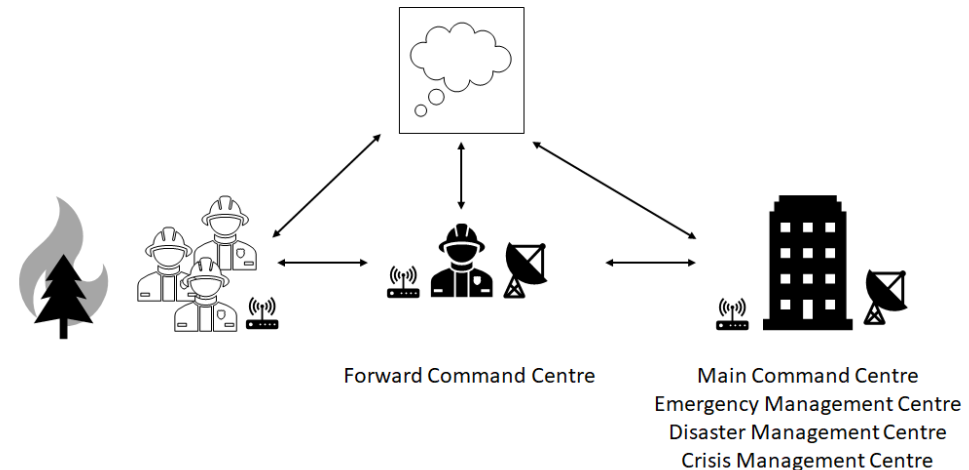

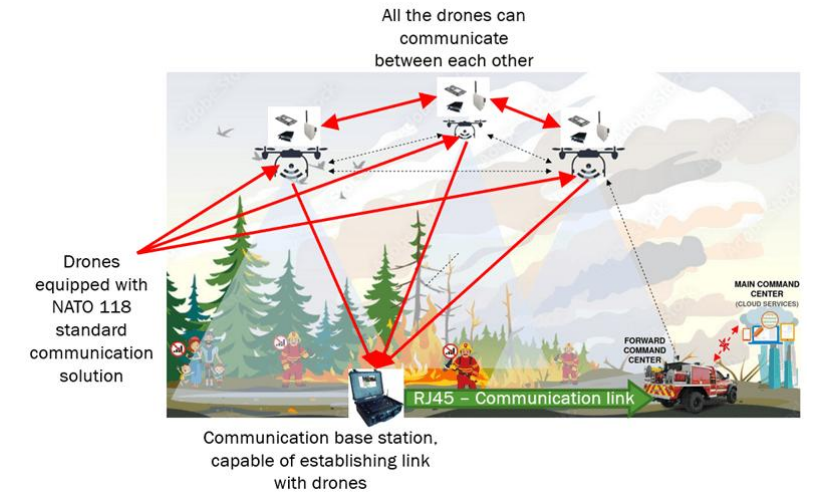

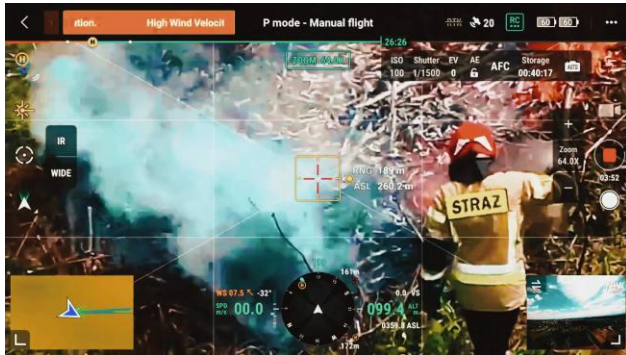

3. Fire spread forecast

End-technology tools

1. Fire monitoring using UAVs (drones)
2. The use of UGVs (robots)
3. Forward Command Centre
4. MESH-in-the-Sky

- #### 4. Evacuation Route Planning (DSS-ERP)

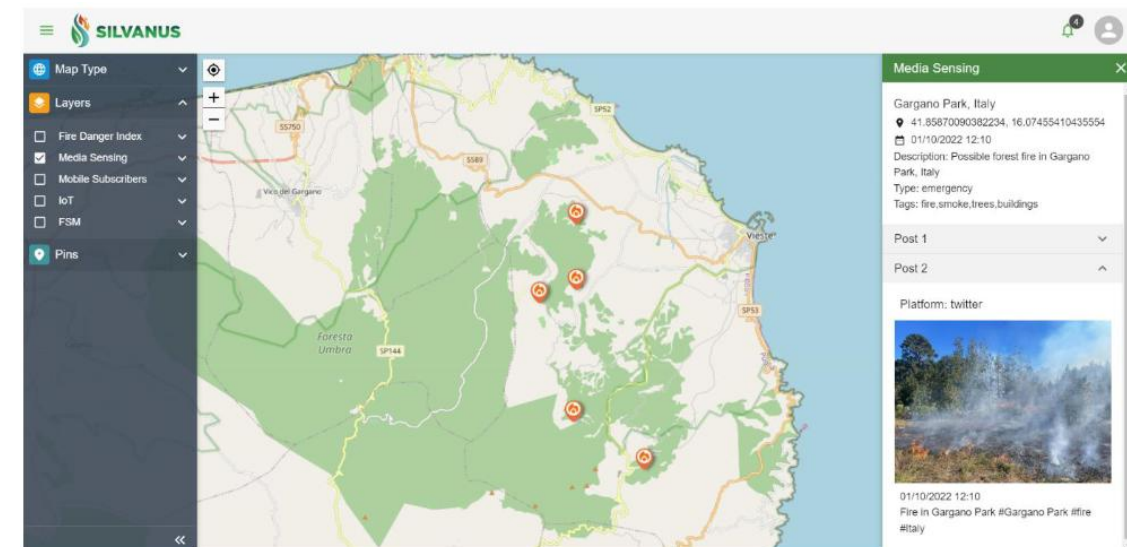

Societal involvement tools

1. Augmented reality / virtual reality training for firefighters

2. Citizen engagement application

3. IT Dashboard
