

WEBINAR INVITATION

COLLARIS Network: Drones in Civil Protection and Crisis Management Activities

16.05.2025 | 9.30 – 11.30

Online

Event details

The COLLARIS Network gathers crisis management and civil protection practitioners, research institutions and public administration interested in collecting and transferring knowledge, exchanging experiences, skills, good practices and information on operational procedures for the optimal use of drones in crisis management and rescue missions.

Our aim is to effectively stimulate a wider and more complex use of UAV/UAS by facilitating sharing of lessons learnt from the adoption of innovative solutions and their absorption into operational practices. Another goal is to deliver knowledge and recommendations supporting the development and implementation of systemic solutions representing enablers for efficient use of UAV/UAS.

To this end, we would like to invite you to a webinar presenting the foresight report „**2030 horizon for drones in civil protection and crisis management activities**” and most promising drone use-cases. We would also like to share information about COLLARIS activities planned for 2025 and encourage you to participate in those that might be of interest to you.

Register

To receive the link to the meeting, please confirm your participation by sending an e-mail to collaris-network@cbk.waw.pl by the 14th of May EOB.
