

Extreme Wildfire Events Data hub
for improved decision-making

PROJECT OUTPUTS

For wildfire practitioners and researchers

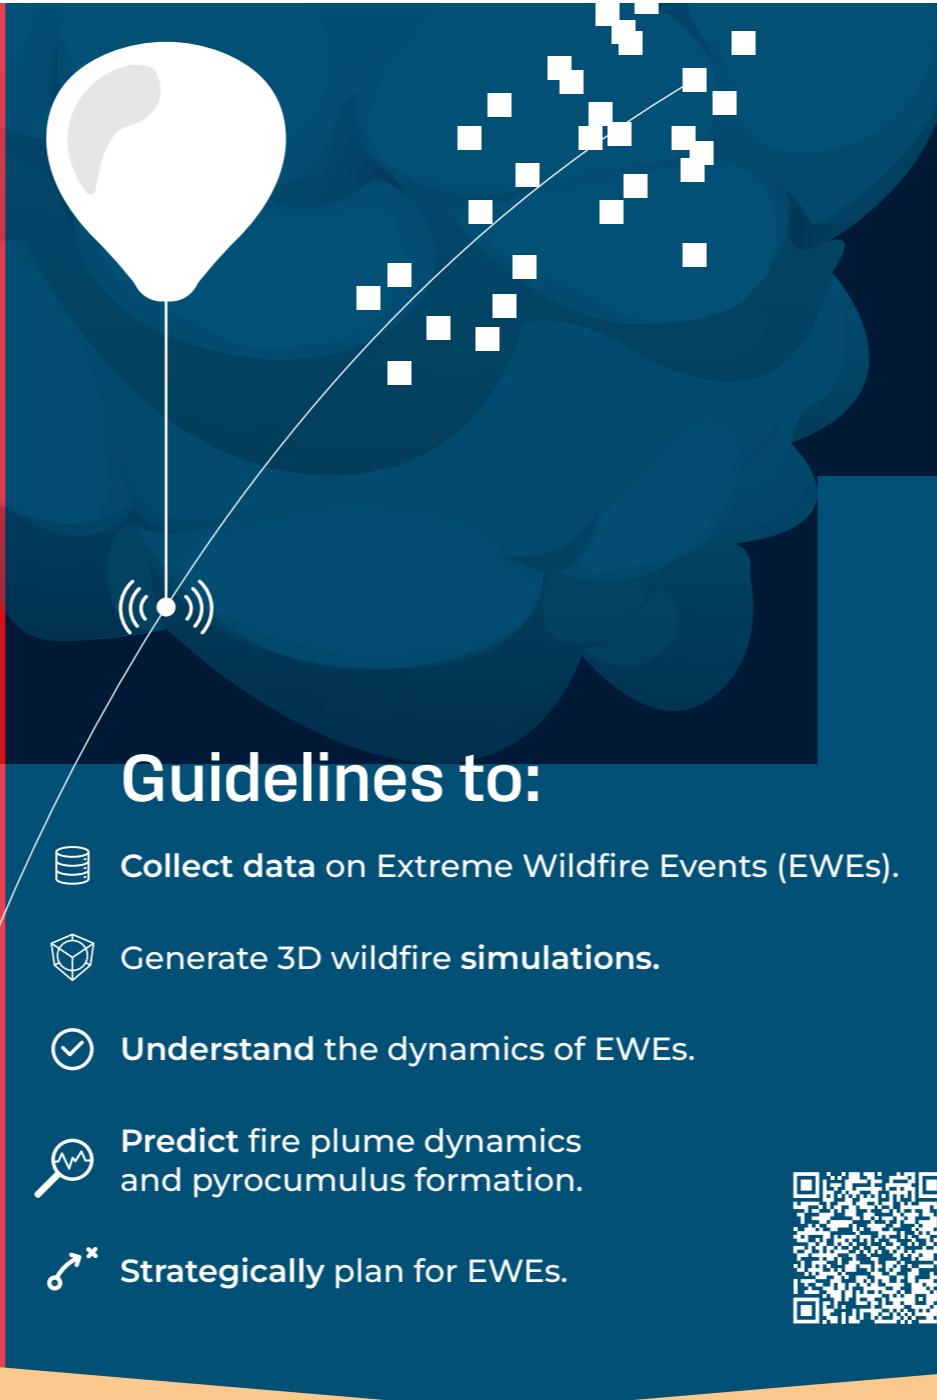

WDP
Wildfire Data Portal
wildfiredataportal.eu

A novel open-access tool with:

- 🔥 Meteorological and fire data collected during wildfires and prescribed burns across the world.
- 🌐 Models and simulations to understand and anticipate extreme fire behaviour.
- ▶️ Engaging video clips explaining key scientific concepts.

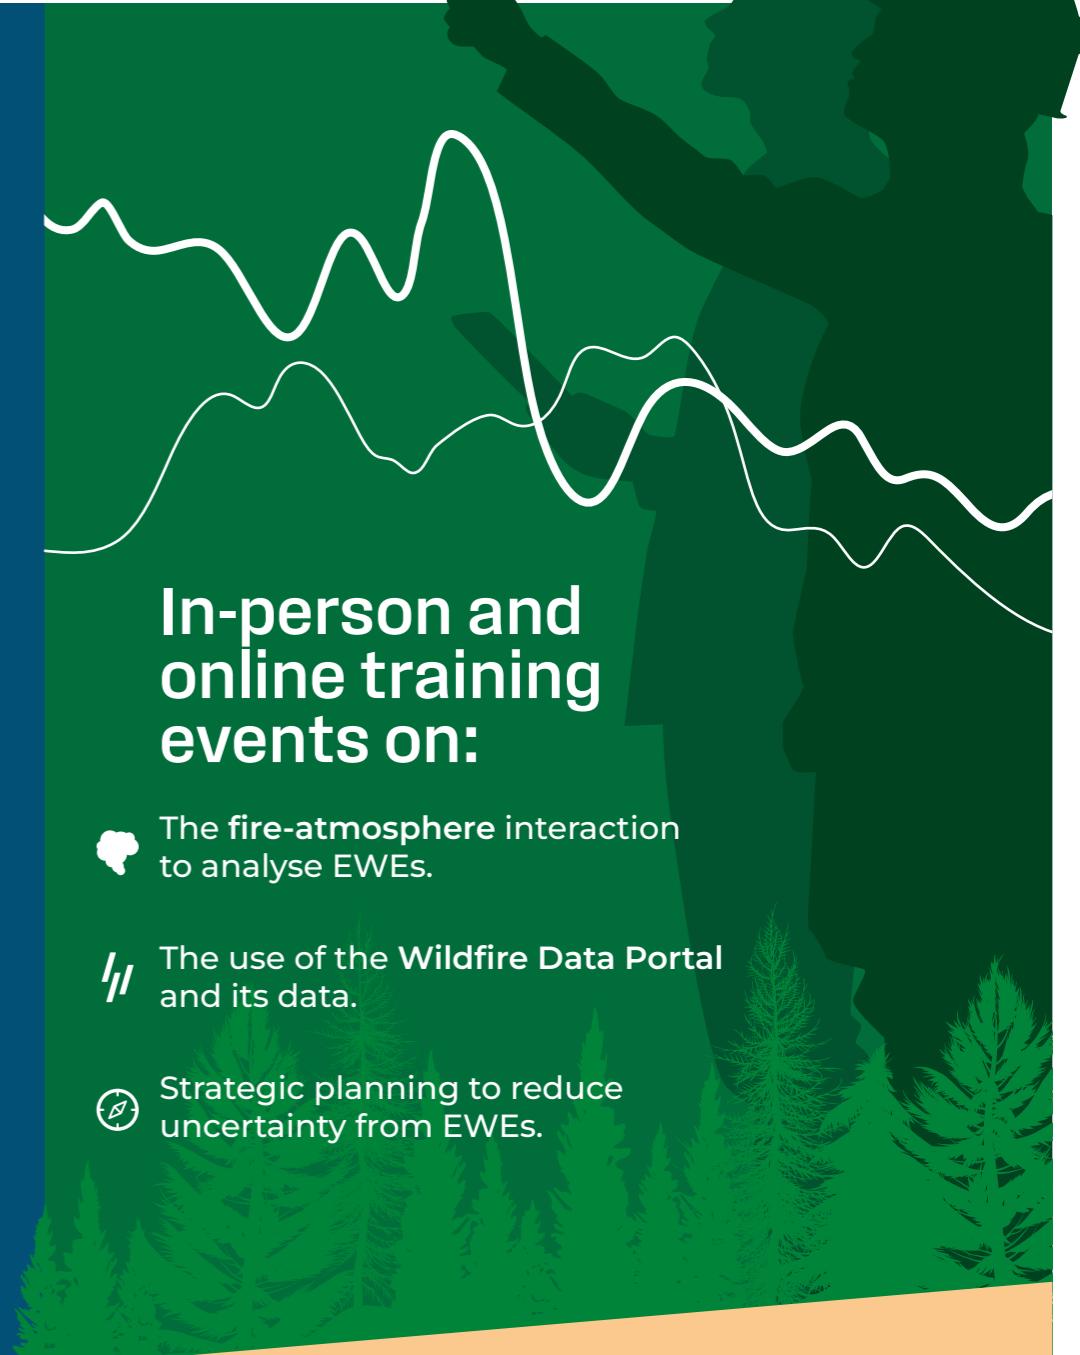

Guidelines to:

- 📅 Collect data on Extreme Wildfire Events (EWEs).
- 🎲 Generate 3D wildfire simulations.
- ☑️ Understand the dynamics of EWEs.
- 🔍 Predict fire plume dynamics and pyrocumulus formation.
- 📍 Strategically plan for EWEs.

In-person and online training events on:

- 头脑 The fire-atmosphere interaction to analyse EWEs.
- 🌐 The use of the Wildfire Data Portal and its data.
- 📋 Strategic planning to reduce uncertainty from EWEs.
