

ALERT AND IMPACT- FORECAST STANDARDS FOR EMERGENCY MANAGEMENT

STRENGTHENING EUROPE'S PREPAREDNESS AND RESPONSE

Our Mission

ARTEMis aims to strengthen Europe's preparedness and response to natural hazards in the context of climate change. By enhancing risk awareness, improving early warning and supporting coordinated action, the project contributes to safer, more resilient communities through trusted and interoperable solutions.

Rising risks, stronger response

The growing intensity of natural hazards driven by climate change calls for an upgraded and more efficient emergency response across Europe.

One framework, enhanced coordination

ARTEMis aims to unify and harmonise methodologies, protocols and tools for emergency management by integrating Earth Observation data, AI-driven analytics, and real-time information sharing.

Our Approach

ARTEMis combines scientific excellence with operational expertise, bringing together authorities, researchers and technology providers. Through cross-border use cases and validated pilots, the project aligns existing systems, standards and practices into a collaborative emergency management framework.

**Funded by
the European Union**

This project has received funding from the European Union's Horizon Europe research and innovation program under grant agreement No 101225852.
