Newsletter #3 - September 2026

Welcome back!

In this newsletter, we look back at the project's key achievements and activities throughout 2026, highlight upcoming milestones and important dates, and share updates from events where the INLINE team presented project results, engaged with stakeholders, and promoted the project's to enhance the capabilities of early warning systems over Europe.

Reminder: Join Us For the Next CoI Meeting

📅 Thursday, 17th September 2026
🕐 13:00 - 14:00 (UK) | 14:00 - 15:00 (CEST)
📍 Online - Google Meet

After the summer break, the INLINE Community of Interest is back. Join us for our next CoI Meeting, where we will introduce the new INLINE training materials, share the latest progress on integrating user-defined exposure data into INLINE notifications, and showcase use cases and lessons from the summer.

Feel free to share this invitation with colleagues and others in your network who might be interested.

We look forward to seeing you there.

New INLINE Training Materials Now Available

New training materials are now available on the INLINE platform to help users get started and make the most of its features. The new documentation and video tutorials provide step-by-step guidance on navigating the platform, understanding its key functionalities, and using its tools effectively.

Whether you are a new user or would like to refresh your knowledge, these resources are designed to support you in using the platform with confidence. The training materials are available directly through the INLINE platform using the link below.

Reminder: We Still Need Your Feedback

Have you already completed the INLINE surveys? If not, there is still time to share your feedback. Your input is essential to help us improve the INLINE platform and ensure it meets the needs of the end-users.

If you are a member of the Community of Interest and have not yet completed the Initial Survey, we encourage you to do so. Your insights will help us better understand your needs, expectations, and experiences, supporting the ongoing development and evaluation of the project.

If you are registered on the INLINE platform, you can report an event and complete the INLINE Notification Performance Feedback survey. Your feedback on the notifications you receive will help us improve their accuracy, clarity, and usefulness, and objectively measuring the project's achievements.
